

Housing and Interiors Window Treatment Project

Mary and John Smith have contacted your firm in order to have you come up with new window treatments for their vacation home. They have given you several choices in treatments and a floor plan of their home.

YOUR ASSIGNMENT

1. Choose from teacher a color scheme and a color
2. Choose the window treatment for each room. If a room has more than one (1) window, use the SAME treatment for each window.
3. On paper given to you by teacher, cut out the floor plan and place in center of paper.
4. Using color pencils create window treatments using different textures and shapes using the color scheme and color from #1. Only ONE room can be a solid. All others must be some type of design.
5. Place the colored window treatment around the floor plan to represent each room. Label each room (see below)

LIVING ROOM

KITCHEN

BATH

BEDROOM 1

BEDROOM 2

DINING ROOM
